

ABSTRACT OF THE DISCLOSURE

METHOD AND APPARATUS FOR PRODUCING AN AQUEOUS PAINT COMPOSITION FROM A PLURALITY OF PREMIXED COMPONENTS

The present invention is directed to the provision of premixed aqueous
5 compositions which are used to provide a paint composition of varying finish
characteristics at the point of sale. Thus, the merchant distributing the paint composition
made from the subject premixed compositions need only maintain inventory of four
compositions. The particular compositions which are the subject of the invention exhibit
stable characteristics during storage in their respective reservoirs. The compositions
10 include a pigment composition, a dispersant thickening agent, a high resin content binder,
and a low resin content binder. The compositions are combined in differing amounts to
produce paint compositions being suitable for either interior or exterior use and having
differing sheens, quality levels, and color bases.
